PROJECTS

BUILDCOMP

In Development

- A PC Part finder that finds PC components based on your specifications and budget
- Uses React, HTML, CSS, Bootstrap, Python, JavaScript, Figma for a prototype, Azure, Jira for creating tickets, and Typescript

WEATHER APP

- An application that takes weather information from an API and then gets a 5 day forecast with the high and low temperatures for the day
- Uses React, HTML, CSS, Bootstrap, Azure, weather forecast API, and JavaScript

POKEMONAPI

- An application that fetches data from the PokeAPI and displays the data in card form.
- Uses HTML, CSS, React, Azure, Bootstrap, and JavaScript

SKILLS

- **Languages:** C#, JavaScript, Typescript, HTML5, CSS, SQL
- **Frameworks/Libraries:** .NET6, React, Node.js, Bootstrap, TailwindCSS
- **Productivity:** Figma, Postman, Slack, VS Code, Jira, Canva, Microsoft Azure
- **Certificates:** Codecademy Javascript Certificate, Codecademy React: Introduction Certificate, Codecademy C# Certificate, Codecademy HTML Certificate

PRODUCTIVITY

- Used Jira to create tickets to keep team organized and productive
- Used Postman to make sure that API fetch calls were working
- Used Slack to communicate with instructors and peers to get projects done
- Used Figma to create dynamic prototype websites
- Used Notion to create organized and concise notes to share with team members.
